

K-12 BUNDLE: SECURITY FOR EDUCATION INSTITUTIONS

Unified protection for staff and student devices

K-12 Education: The Cybersecurity Gap

Today's educational IT environments have Chromebooks, Android, and iOS devices—including school- and student BYOD-owned—that greatly enrich the student learning experience. Putting a device in the hands of every student has become the new normal for schools. In fact, 59% of educational institutions have at least one device per student in the classroom, and there are more than 50 million Chromebooks in schools worldwide.^{1,2} However, unprotected mobile devices introduce security risk.

In addition, there has been a 466% increase in malware attacks against K-12 schools.³ Therefore, it is also of vital importance to protect staff endpoints too.

Security Made Easy for Schools

Protecting school devices against outside threats demands advanced protection that's also easy for small IT teams to use. ThreatDown K-12 Bundle delivers the perfect balance between power and ease with a solution that's every bit as strong as schools need yet simple to manage.

Award-Winning Endpoint Security

ThreatDown K-12 Bundle features our advanced technologies and 24x7x365 services managed by our cybersecurity experts for comprehensive protection delivered as a single, hassle-free bundle. K-12 Bundle is built on our strongest AI/ML-driven prevention, detection, and response technologies fortified by built-in innovations that shrink your attack surface. These technologies simplify the process of finding and patching software vulnerabilities and prevent unauthorized programs from executing.

Advanced Mobile Protection

ThreatDown K-12 Bundle provides effective protection for Chromebooks, Android, iPadOS, and iOS devices, guarding against the latest mobile threats such as ransomware, malicious apps, and potentially unwanted programs (PUPs). With real-time protection, schools can also prevent accidental access to harmful websites, safeguard against malicious apps, block unwanted in-app ads, and enable a secure mobile experience for their students.

Unified Endpoint Management

ThreatDown extends powerful endpoint protection across all devices to substantially strengthen your school's cybersecurity posture. Quick and easy to deploy, it saves time and resources with unified endpoint management for both traditional and mobile devices—all from the same cloud-native console.

Gain Centralized Visibility

Powerful security starts with pervasive visibility. You can easily view activity across all your devices—in real time.

- Single, unified platform and visibility for your traditional and mobile endpoints
- Monitor and protect your devices from a single pane of glass
- Understand the threats to your devices and mitigate the risks

ThreatDown Helps Schools

- **Superior Defense**
Award-winning security innovations and 24x7x365 service that optimize device uptime and student/staff productivity
- **Easiest to Use**
Intuitive design with simplicity and speed in mind. Suitable for resource-constrained K-12 IT teams
- **Best Value**
Powerful protection and simplicity at an affordable price for an excellent return on security investment

ThreatDown K-12 Bundle – Features

- **Managed Detection and Response:** 24x7x365 monitoring by our experts, who analyze, respond to, and remediate threats on your behalf (even those that escape technological detection)
- **Endpoint Detection and Response:** Award-winning solution that provides continual active detection and response, suspicious activity monitoring, integrated cloud sandbox, and Ransomware Rollback
- **Managed Threat Hunting:** Automated alert scanning that correlates EDR data against external and internal threat intelligence feeds, prioritizing threats and escalating the most critical with clear, step-by-step, response guidance
- **Endpoint Protection:** Defense-in-depth prevention that stops signature-based, fileless, and zero-day attacks before they infiltrate your system
- **Vulnerability Assessment:** Run scans on demand or on schedule to search for operating system and application vulnerabilities
- **Patch Management:** Automate the patching process to lock up potential access points
- **Application Block:** Easily block unauthorized programs to enforce acceptable-use policies
- **Incident Response:** Built on our proprietary Linking Engine that not only removes malware executables but finds and automatically eradicates all associated files and changes to prevent re-infection
- **31-day lookbacks** by our team of experts, who search for Indicators of Compromise to stop attacks and refine detections and alerts going forward

Mobile Security – Features

	Chromebook	Android	iOS
24/7 real-time protection against emerging threats	✓	✓	✓
Advanced antivirus, anti-malware, anti-spyware & more	✓	✓	
Malicious app protection	✓	✓	
App privacy audit	✓	✓	
Safe web browsing		✓	✓
Block ads and ad trackers			✓

Outcomes for Schools

- Secure staff resources with expert service and innovative technologies, including: laptops, desktops, and servers
- Preserve the security and quality of your Chromebooks, Android, and iOS devices
- Protect your students and keep them safe from noxious cyber threats
- Improve the security of your school environment by safeguarding your mobile devices
- Save time and money by adding mobile security without introducing another management tool
- Reduce helpdesk tickets related to mobile alerts and infections
