THREATDOWN INTEGRATION WITH KASEYA VSA

Deliver advanced endpoint security through the Kaseya VSA platform

ThreatDown's integration with Kaseya VSA, an award-winning remote management and monitoring (RMM) platform, helps Managed Service Providers (MSPs) protect their clients from malware so they can quickly recover from infections and maintain business continuity.

OVERVIEW

ThreatDown, powered by Malwarebytes, is a leader in the endpoint security space for MSPs with a best-in-class portfolio. Its integration with Kaseya VSA syncs data between both solutions, so you can deliver strong endpoint security for your clients using the latest ThreatDown scanning and remediation tools. You can also uncover new options for generating revenue by offering endpoint security as a new product and service.

KEY CAPABILITIES

ThreatDown's integration with Kaseya VSA enhances your clients' security and streamlines your endpoint management capabilities. Together, these powerful solutions boost your team's productivity by eliminating manual tasks and blocking malware that threatens your clients' businesses.

Reduces manual effort and enhances productivity
The integrated products will save your staff time by enhancing process automation. ThreatDown can detect and register new endpoints, without manual intervention, while providing an extremely simple process for linking customers and sites with Kaseya to ensure data between the two platforms stays in sync. The integration streamlines your deployments by automatically discovering and installing the ThreatDown agent on new endpoints.

Automatically generates tickets for new security threats
ThreatDown, powered by Malwarebytes, and Kaseya protect your clients' endpoints by working together to keep you and your team abreast of any newly detected threats. This enables you to act quickly and keep your customers' environments safe.

KEY BENEFITS

Boosts your staff's productivity and minimizes costs

Ensures your clients' business continuity

Drives greater value from your Kaseya investment
Kaseya®

INTEGRATION BENEFITS

Boosts your staff's productivity and minimizes costs

- Enhances process automation
- Eliminates the need to purchase disparate systems that require additional time to manage
- Supports staff using the familiar Kaseya VSA interface, eliminating the need to learn another tool

Ensures your customers' business continuity

- Decreases time to scan and remediate
- Reduces malware attacks
- Minimizes downtime and the impact of infections, including preventing lateral spread across the network

Drives greater value from your Kaseya investment

- Ensures strong security for your customers' endpoints
- Increases your customers' uptime and business productivity
- Provides additional revenue stream

BEST-IN-CLASS ENDPOINT SECURITY FOR MSPS

The cloud-based ThreatDown, powered by Malwarebytes, portfolio provides a broad range of solutions to support your endpoint protection and remediation needs including:

THREATDOWN ENDPOINT DETECTION AND RESPONSE

Endpoint detection and response (EDR) technology automatically detects, isolates, and remediates new threats for both workstations and servers, providing proactive protection and zero dwell-time in recovering from attacks.

THREATDOWN ENDPOINT PROTECTION

Advanced endpoint threat prevention solution for both workstations and servers that uses multiple detection techniques for full attack chain protection.
