Malwarebytes

Endpoint Detection and Response for Servers

IT Managers shouldn't have to sacrifice performance to protect their business.

Lightweight performance

Shrink the footprint of your EDR agent to minimize impact on your server's disk performance and utilization.

< 175 MB

Optimize compute impact

Keep your applications humming by offloading compute-intensive tasks to the cloud-native Nebula platform.
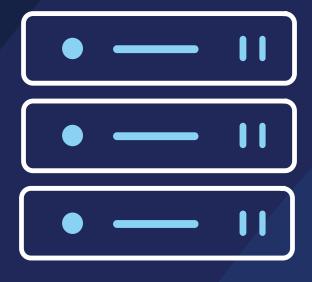

< 0.3% CPU Utilization

Minimize brain drain

Keep your memory resources available for those applications that matter most to your business.

< 409 MB RAM

Kick back and relax

With Malwarebytes EDR for Servers installed, all applications on your servers will continue to run fast. The IT manager should have peace of mind that there is no hit on server performance and that their systems are being fully protected by Malwarebytes.
