ThreatDown Elite

Robust protection that is efficient and cost-effective

Organizations need superior protection in a single, easy-to-use package that won't break the bank

Cyberattacks aren't slowing down. In 2023, ~82% of organizations experienced at least one successful cyberattack, and only 57% of ransomware victims who paid ransoms recovered their data.[1]

Benefits

Purpose-built for resource-constrained organizations, Elite delivers comprehensive protection in a single solution that offers unparalleled ease-of-use and security analysts at a price that makes sense.

Improve Security

- **24x7x365 endpoint monitoring and response** by our team of cybersecurity experts with 150 years of collective experience in threat hunting, forensic analysis, and incident response.
- **Attack detection** through award-winning technology with suspicious activity monitoring, freeform threat hunting, and Ransomware Rollback.
- **Accelerated response** through patent-pending technology that continually scans alerts, escalating only the most critical, to which our team can respond on your behalf.
- **Threat prevention** with multi-vector protection that won't slow your devices.
- **Attack surface reduction** via vulnerability scanning and automated patching.
- **Application blocking** to prevent unauthorized programs from executing on endpoints.
- **Security that only gets better with age** because, based on lessons learned, our team of experts refine security techniques for faster, more precise detections and alerts over time.

Challenges

- Too many attacks are successful – 70% of organizations bore the brunt of ransomware last year[2]
- Threat actors linger too long – 277 days on average to identify and contain a breach[3]
- Multiple point solutions increase cost and complexity – 55 cybersecurity tools on average that organizations have deployed[4]
- IT/security teams are understaffed – 86% of security teams are experiencing a skills shortage[5]

Benefits

- Improve Security – Patch identified software vulnerabilities to reduce the risk of a successful cyber attack
- Reduce Complexity – Eliminate time and effort spent on finding and deploying patches to vulnerabilities through automation
- Optimize Performance – Eliminate bugs and enhance the overall stability and performance of your applications

Reduce Complexity

- **Centralized management** via cloud-based console with user-friendly interface that eliminates the need to learn multiple consoles—even when adding security capabilities.

- **Single lightweight agent** that deploys in minutes and works across all ThreatDown products.

- **Device visibility** with color-coded cues for at-a-glance security status.

- **Auto remediation** via proprietary Linking Engine that finds and automatically removes most malware executables and associated artifacts, changes, and process alterations.

- **Security Operations Center (SOC)** in a box with our technologies managed by our experts to augment your team's efforts.

Maximize Value

- **Fastest implementation** validated by the G2 Fall 2023 Implementation Index, which shows that our suite has the shortest go-live time of all competitive solutions.

- **Easiest to manage** validated by the G2 Fall 2023 Usability Index, which awarded our suite "Easiest to use" for its ease of administration and use.

- **Best ROI** validated by the G2 Fall 2023 Results Index, which awarded our suite "Best estimated ROI" of all competitive solutions.

- **Best value** for one bundle, one agent, one console, one SOC, and one trusted partner.

Features

- **Managed Detection and Response**: 24x7x365 monitoring by our experts, who analyze, respond to, and remediate threats on your behalf (even those that escape technological detection).

- **Endpoint Detection and Response**: Award-winning solution that provides continual active detection and response, suspicious activity monitoring, integrated cloud sandbox, and Ransomware Rollback.

- **Threat Hunting**: Automated alert scanning that correlates EDR data against external and internal threat intelligence feeds, prioritizing threats and escalating the most critical with clear, step-by-step, response guidance.

- **Endpoint Protection**: Defense-in-depth prevention that stops signature-based, fileless, and zero-day attacks before they infiltrate your system.

- **Vulnerability Assessment**: Run scans on demand or on schedule to search for operating system and application vulnerabilities.

- **Patch Management**: Automate the patching process to lock up potential access points.

- **Application Block**: Easily block unauthorized programs to enforce acceptable-use policies.

- **Incident Response**: Built on our proprietary Linking Engine that not only removes malware executables but finds and automatically eradicates all associated files and changes to prevent re-infection.

- **31-day lookbacks** by our team of experts, who search for Indicators of Compromise to stop attacks and refine detections and alerts going forward.
